

# Dark Mode Implementation - News App

This project demonstrates the integration of a dark mode theme for a mobile news application. The purpose is to enhance visual comfort and improve accessibility for users in different lighting environments.

---

## ✓ ☐ Light Mode:

- Standard white background with black text.
  - Suitable for well-lit environments.
  - Clear typography and layout for optimal readability.
- 

## ✓ ☐ Dark Mode:

- Uses a dark gray or black background with light-colored text.
  - Reduces eye strain, especially in low-light settings.
  - Conserves battery on OLED screens.
  - Meets WCAG accessibility contrast standards.
- 

## ✓ ☐ Dark Mode Toggle:

- Positioned in the top right corner of the app.
  - Allows users to switch between light and dark themes instantly.
  - Provides a personalized reading experience.
- 

This redesign ensures both aesthetic appeal and functionality while prioritizing user comfort and accessibility across different modes.
